Cheap CRT Monitor

*works best with stable footage / logos

Ultra-Realistic CRT Monitor (For Logos)

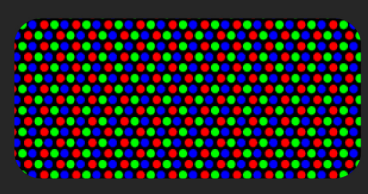

*works best with logo animations

UI PAGE 2

(section 1)

Grid patterns

Controls the screen's diode pattern.

Circular grid patterns typically produce a sharper / more **LED SCREEN** like aesthetic.

Rectangular grid patterns accurately reproduce the **CRT SCREEN** look with intricacy.

NOISE LEVEL

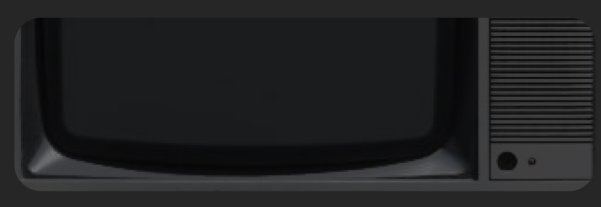

Adjusts the static noise in the darkest portions of the screen.

Visual Effects

GLITCHES

Distorts the signal to get analog inspired glitches.

TV BORDERS

Warps the corners of your image into the signature CRT screen shape.
